## TECHNICAL SKILLS

**Programming Languages:** C++, JavaScript, Python  
**Frontend Development:** HTML5, CSS3, React.js, Tailwind CSS, JWT Authentication  
**Backend Development:** Node.js, Express.js, RESTful APIs  
**Databases:** MongoDB, SQL  
**Core Computer Science:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks  
**Tools & Platforms:** Git, GitHub  
**Coding Profiles:** Solved 100+ problems on LeetCode

## EXPERIENCE

- Software Development Intern**  
*SMNIFY (On-Site)* June 2026 – Aug 2026
  - Completed a 45-day on-site internship contributing to the full lifecycle of application development.
  - Explored AI coding assistants, LLM-assisted development, and prompt engineering to speed up feature builds and automate simple task workflows.
- Frontend Developer Intern**  
*Unified Mentor (Remote / India)* May 2025 – June 2025
  - Developed responsive web interfaces using HTML, CSS, JavaScript, and React.js. Integrated REST APIs to render dynamic data across multiple dashboard pages. Reduced page load time by 20% using lazy loading and code splitting techniques.

## PROJECTS

- Gym Management System** Jan 2025 – Feb 2025  
*Technologies: Java, JavaScript, Node.js, MySQL, REST API, Python, HTML/CSS*
  - Full-stack app for managing gym members, staff, attendance, subscriptions, and fee tracking.
  - Role-based dashboards (Admin/Trainer/Member) with secure login and real-time attendance charts.
  - Automated monthly fee reminder notifications using Python scripts and cron jobs.
- Disaster/Emergency Resource Locator** Jun 2026 – July 2026  
*Technologies: React.js, Node.js, MongoDB, Socket.io, Google Gemini API, Leaflet.js, JWT, Tailwind CSS*
  - Built a full-stack, crowd-sourced disaster relief coordination platform enabling real-time reporting and resolution of emergency help requests (medical, food, shelter, rescue) with live geospatial mapping.
  - Integrated Google Gemini API for automated request triage – classifying category, urgency (1–5 scale), and extracting key details from free-text descriptions, reducing manual sorting effort for volunteers.
  - Implemented geospatial search using MongoDB's 2dsphere indexing, enabling sub-second radius-based filtering of active requests for nearby volunteers.

## CERTIFICATIONS

- The Bits & Bytes of Computer Networking** — Coursera Dec 2025
- Introduction to Machine Learning** — NPTEL, IIT Kharagpur Jan–Apr 2025
- Marketing Analytics** — NPTEL, IIT Kharagpur (*Elite +Silver | Score: 83%*) Jan–Apr 2026

## ADDITIONAL INFORMATION

- Student Coordinator, E-Cell** – Organized and coordinated events, managed participant communication, and supported team operations.
- Languages** – Hindi, English.
- Hobbies** – Cricket, Football, Cooking, Debate.
